(385) 288 9580 • nbarton915@gmail.com

## OBJECTIVE

---

To study technology and business in the Information Systems program and participate in the associated club to increase my skill set, industry knowledge and work with talented and hardworking peers and professors

## EDUCATION/TRAINING

---

### Brigham Young University

*Pre-management*

Provo, UT

*September 2014 - Present*

#### Accomplishments/Participation

- GPA: 3.78
- Support crew for BYU Young Ambassadors – Master Electrician
- Honors Program

## SELECTED EXPERIENCES

---

### Ken Garff Honda of Ogden

*Parts Delivery Driver- Assistant Warehouse Manager*

Riverdale, UT

*January 2014 – August 2014*

- Took direction from the warehouse managers in the timely delivery of automotive parts to dealerships and body shops in the Salt Lake, Davis, and Cache counties as well as lower Idaho
- Met with old customers, under the direction of the parts manager, with hopes of discovering an agreement that would help the customers once again order parts from the store
- Awarded employee of the month award for “DRIVING success in customer satisfaction” in April
- Worked alongside the warehouse manager as her assistant to manage customer invoices, inventory, delivery of parts and the work load of each delivery driver as part of an assignment given in May
- Aided in the shipping and receiving tasks throughout the day by securing all parts to be shipped immediately upon request and preparing them to be shipped, as well as scanning all incoming inventory and preparing the paper work to go to accounting

### Department of Arts Production

*On Call Electrician's Assistant*

Brigham Young University

*August 2014 – Present*

- Helped to facilitate the setup, execution and tear down of events in the Harris Fine Arts Center theaters. These events require physical labor, console programming, people management and timed response to cues as well as the ability to work with a team that fluctuates in size to complete tasks in a timely manner

### BYU Young Ambassadors

*Master Electrician*

Brigham Young University

*November 2014 – Present*

- Travel with the Young Ambassadors touring performance group to lead a small team of electricians and technicians who are charged with handling the lighting and effects requirements of the show in each venue
- Help load and unload all equipment at the receiving dock for each production
- Accountable for the lighting and effects equipment that is brought on tour
- Work with the house electricians at the venue to integrate the house system with the touring system to produce lighting that most closely matches the lighting designer's original design and can be set up and taken down in a timely manner
- Work with the audio and costuming teams to help with their needs so that the show begins and ends on time

### Mozenda, Inc.

*Junior Software Quality Assurance Engineer*

Provo, UT

*April 2015 – Present*

- Identify and evaluate technical risk related to the enterprise software by inspecting features using BATs, exploratory, regression, A/B, and technical specification tests, to accurately report to management the status of production deployments and new and upcoming features
- Mitigate technical risk by recording found bugs in issue tracking software, JIRA, and working with the development team to resolve the issue and verify its fix in a timely manner
- Monitor and update the internal test system and database to ensure that each of the available servers have the latest builds from assigned repositories, allowing the entire development team to test on an up-to-date, mock production configuration with unobscured source code
- Evaluate and audit the work of all SQA team members, under the direction of the QA director, to assess the strengths and weaknesses of the team, resulting in more accurate time and skill costing, frequent training, and lower operations risk assumed in the QA department
